TalentED

GEO-ENABLING THE STUDENT JOURNEY

talentedcareerpathways.org

The California Community Colleges Vision for Success underscores the need for innovative tools and partnerships that demonstrate how community colleges impact students' lives and add value as an engine of economic mobility. TalentED is a geo-enabled career navigation hub that provides actionable workforce data, mapping and visualization capabilities that empower students to find programs, enter a pathway, and reach their career goals. A regional collaboration of Orange County community colleges and business partners, TalentED story maps feature priority industry sectors and high skill, high demand jobs.

By harnessing the power of GIS technology, TalentED story maps take career exploration to a new level.

What are story maps?

Story maps combine interactive maps with text, images and multimedia content. They make it easy to use the power of maps and location to help students navigate their journey from education to the workforce.
